

MF TW SERIES // ROUND BALE WRAPPERS

DAIRY FARMS // HAY OPERATIONS // BEEF FARMS

The Massey Ferguson® TW series of individual bale wrappers sets the bar high when it comes to productivity and improving feed quality. With lower horsepower and tractor requirements, two models to choose from and several standard features, the TW Series is a versatile implement perfect for operations looking to wrap bales quickly, gently and efficiently.

Farmer-Focused Features

- » Simple in-cab operation of bale wrapper
- » TW.130 can wrap four-foot-wide bales while operating in a semi-automatic mode
- » TW.160 can wrap either four-or-five-foot-wide bales in either a semi-automatic or fully automatic mode
- » Standard fully hydraulic self loading arm on both models
- » Standard gentle unloading cycle
- » Standard bale tipper on TW.160 (optional on TW.130)

Tractor Requirements and Adaptability

- » The adjustable clevis hitch on both wrappers allows for easy coupling to almost any tractor
- » While the horsepower requirements are low for the TW Series, the weight of the wrapper and bale must be kept in mind
- » The MF 4707 is a great tractor to have in front of either of the TW Series bale wrappers

MODEL	HYDRAULIC REQUIREMENTS	WEIGHT LB	MAX BALE WIDTH FT	TRANSPORT WIDTH IN
TW.130	8 GPM 2,175 PSI	2,375	4	100
TW.160		4,650	5	90
